## DIRECTIONS FOR USE

### To Ease Snow Removal:

Apply **MELT-PRO** at the beginning of snow storm if possible. Broadcast approximately 1/4 oz. per square yard over area to be treated.

### For Ice Removal:

Apply **MELT-PRO** evenly over surface at the rate of approximately 8 oz.(1 cup) per square yard for each 1/4 inch of ice.

**USE PRECAUTIONS: MELT-PRO** will not chemically harm concrete. As with all melting products, it will increase the number of freeze-thaw cycles, the major cause of surface damage. A combination of factors such as quality, mixing, finishing, curing and porosity of the concrete will affect its durability. Individual situations differ. The user must determine the suitability before application. Applications of **MELT-PRO** followed by quick removal of snow and ice will lessen the possibility of damage.

**DO NOT USE ON CONCRETE LESS THAN ONE YEAR OLD.**

**DO NOT USE ON CONCRETE AND MORTAR JOINTS BETWEEN BRICK OR STONE UNLESS CONCRETE AND MORTAR HAS BEEN PROPERLY SEALED (WATERPROOFED).**
